

The Advantages of a monitored Lubrication System

The System is fully flexible.

Is Tailored to suit the customers needs.

The system is fully automatic.

It operates after a pre-set dwell period.

All connected points receive the lubricant in sequence.

No lubricant point is missed.

Timer settings are adjustable to meet customer's requirements.

Control System includes Manual Override facility.

Illuminated Push Button:-

*Indicates Run Cycle initiated, and system status,
Also acts as a system override, should extra lubricant be required.*

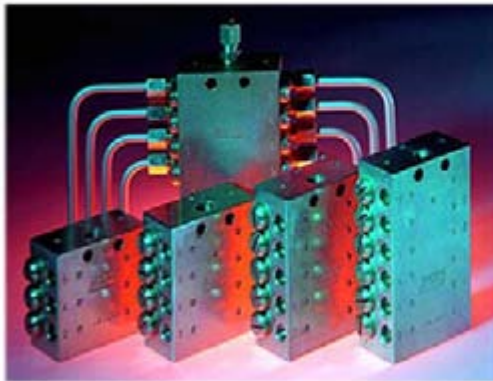

**An external beacon in the enclosure cabinet indicates:-
*System Failure or Low Lubricant Level***
